

# ABEE DIVECORP

SILENT SERVICE UNDERWATER

Founded in 1971 by the late Lieutenant Adhir Chandra Bhattacharjee, Abee Divecorp Private Limited (formerly Abee Engineering Corporation) is India's first commercial diving company.

Established to bridge the gap between industry demands and the Indian Navy's limited capacity for sustained underwater operations, we have grown into one of the country's largest and most diversified commercial diving contractors.

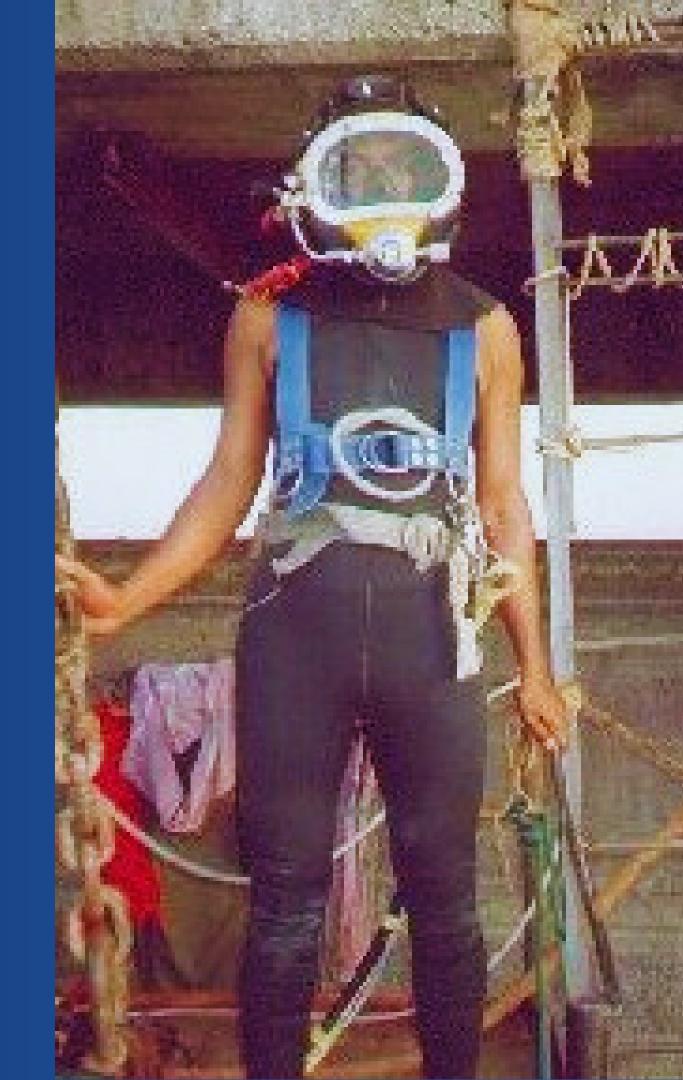

Lt. Adhir Chandra Bhattacharjee (Indian Navy) Founder

# ABOUTUS

Founded in July 1998, Abee Divecorp Pvt. Ltd. emerged from the legacy of Abee Engineering Corporation, India's oldest and one of the largest commercial diving companies, established in 1961 by the late Adhir Chandra Bhattacharjee, a pioneer of the Indian diving industry.

With decades of experience, Abee Divecorp has earned a reputation for excellence, delivering high-quality underwater engineering and diving services to a wide array of clients across India.

Our operations are organized into three core areas: Construction, Inspection, and Speciality Services. Each vertical is staffed with highly skilled professionals and backed by state-of-the-art equipment, ensuring the highest standards of quality and safety, aligned with OSHA Commercial Diving Standards.

## **OUR MISSION**

Over the years, the company has experienced consistent growth in both clientele and projects. Our diverse client base includes steel and aluminum companies, government departments, port authorities, consulting engineers, and power utilities, among others.

Deliver successful outcomes on time and within budget

Offer prompt and reliable services with experienced marine and civil engineering teams

Employ cost-effective, innovative techniques to meet diverse industry needs on a national scale

# **SERVICES**

### **Underwater Inspection & Maintenance**

Regular inspection and maintenance of submerged structures is critical to ensure their safety, functionality, and longevity. Whether it's offshore platforms, ship hulls, or underwater pipelines.

### Marine Pile Repair & Rehabilitation

Marine piles are vulnerable to corrosion, marine borer damage, and physical wear. We offer specialized repair & rehabilitation services to extend their lifespan & restore their structural capacity.

### **Underwater Videography & Photography**

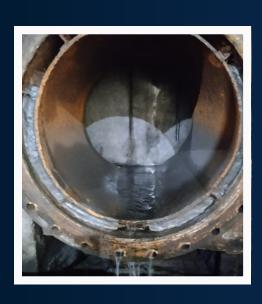

Visual documentation of underwater projects is vital for reporting, analysis, and archiving.

### **Underwater Construction & Repairs**

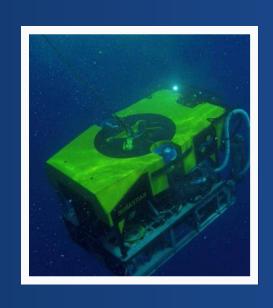

From building new underwater structures to repairing damaged ones, we offer comprehensive underwater construction solutions.

# **SERVICES**

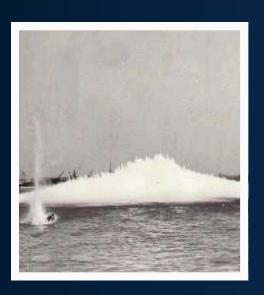

#### Pipeline Laying & Repair

Laying and maintaining underwater pipelines is a complex task that demands precision and expertise.

#### **Hydrographic & ROV Surveys**

Accurate underwater data is essential for marine construction, navigation, and environmental monitoring. Our hydrographic and ROV surveys deliver detailed maps, seabed profiles, and imagery of underwater environments.

#### **Port & Harbor Maintenance**

Ports and harbors require continuous upkeep to support efficient marine operations. We provide a full range of underwater services to maintain these critical infrastructures.

#### Diving Equipment Manufacturing & Sales

Reliable diving gear is the backbone of any successful underwater operation. We design, manufacture, and supply high-quality diving equipment tailored for commercial and industrial use.
